

Greater Reality HEALING Online Program . . .
Journeying FROM Deeply Grieving and Struggling TO Brightly Shining

The bodily death of a beloved person or pet can be one of the most difficult changes in an earthly experience. Other changes – financial losses, health problems, relationship break-ups, and more – can also be very challenging. *When two or more of these occur in a short period of time, it's common to feel overwhelmed and hopeless. **This program primarily addresses grief after loved ones pass on, but can also help you optimally handle any big change / shift in life.***

Much scientific and clinical evidence indicates '[The Great News](#)' about the nature of reality. These descriptors about *how life is really set up* include: life continues after bodily death, you will see your 'departed' loved ones again, and you are an integral and eternal part of Source Energy / The Light. (to learn more, see article #19 at SoulProof.com/Articles)

Knowing more about the big picture of life and living accordingly – whatever that means for you – help you:

- realize your true nature as an eternal being of consciousness / life-force / energy
- use guidance and assistance from angels / highly evolved energies and The Light / God
- heal old wounds, upgrade past misinformation, and release needless fears
- learn to find and share the silver linings / blessings that always accompany adversity
- create the greatest life YOU have envisioned (YOU = your soul / higher self)
- help others by sharing your greatest gifts and making our world a better place
